In 2006, a group of Hispanic leadership gathered in Los Angeles, CA, to discuss the idea of a National Hispanic Health Walk. The idea quickly converted into a more comprehensive approach that would offer opportunities for physical activity, good nutrition and health services and connect participants to year-round activities and services to support a healthy future. The decision was made in part to fight back against a rising tide of negative messages about obesity in Hispanic communities by creating events that celebrate the positive role of Hispanic culture in health, include people of all ages and all sizes, bring together the community and reinforce a culture of well-being.

¡Vive tu vida! Get Up! Get Moving!® is the nation's largest annual event series promoting healthy lifestyles in Hispanic communities. The events are driven by local needs, organized by a leading Hispanic organization in the community and supported by long-term national partners along with over 500 community partners and 1,000 volunteers annually. *¡Vive tu vida! Get Up! Get Moving!®* events are also free of tobacco, as well as alcohol and unhealthy food sponsors, whose advertising blights the physical landscape of too many communities.

Driven by a "can-do" volunteer spirit, *¡Vive tu vida! Get Up! Get Moving!®* is working neighbor-to-neighbor to support healthier environments and to realize the collective vision of our communities for a stronger and healthier nation.

Family Health Centers of San Diego is proud to partner with *¡Vive tu vida! Get Up! Get Moving!®* to promote health and community in San Diego.

In the past, *¡Vive tu vida! Get Up! Get Moving!®* San Diego drew in 20+ community partners with over 1,000 people in attendance. We would like to invite you to participate in this year's *¡Vive tu vida! Get Up! Get Moving!®* event through sponsorship, booth participation or just joining the fun!

FAMILY HEALTH CENTERS
OF SAN DIEGO

Who We Are

In 1970, Laura Rodriguez, a grandmother, activist and Barrio Logan resident, recognized there was no clinic offering comprehensive and affordable health care in her neighborhood. She decided to take action and, along with her neighbors, occupied a local building in an effort to establish a community health clinic. Their determination led to negotiations with the City of San Diego, which eventually gifted the building to the Barrio Logan community.

This building eventually became Logan Heights Family Health Center, the flagship clinic of Family Health Centers of San Diego (FHCSO). FHCSO has since transformed into the 10th largest health center in the country, providing care to over 227,000 patients each year, of whom 91% are low-income and 29% are uninsured.

**FAMILY HEALTH CENTERS
OF SAN DIEGO**

Our Organization At-A-Glance

For over 50 years, Family Health Centers of San Diego has been the lead provider of comprehensive health care and supportive services to San Diego's low-income, uninsured and underserved communities. Our staff provides care to over 227,000 adults and children through more than one million health and medical encounters each year.
